

Website Design Pricing

Wix Website, Platform Subscription Cost • \$350

Client is responsible for maintaining the yearly cost of the wix website platform. The clients I work with either give me their card information to pay for the website, or log in themselves and pay for it. This is the only yearly fee you will have for the website, and is charged directly by Wix. Paying separately from the design work makes it easier to keep up with website expenses.

The design for a website can begin before a subscription is paid for. This often means you can wait to pay until wix has a 50% subscription sale or wait to pay until the website is nearing the stages of completion. This helps reduce cost.

Website Design Cost • \$1,000

This fee covers the entire cost of designing the website, and it includes extra costs associated with the design work such as buying rights to fonts, or any additional elements to your website.

The process:

Step 1: You fill out the website questionnaire to give me an idea of what you are looking for in your website.

Step 2: I begin by designing your website and will send you a PDF of at least 2 different designs (Sometimes 3 options depending on the timeline of completion).

Step 3: We discuss the options and I make revisions based off the conversation and send it back. We will do this until you are happy with the design.

Step 4: I take the design and recreate it on the wix platform. Once it is ready, it needs to be paid for to enable you to view it.

Step 5: I will publish it with a password and send you the information to access and view. You will review it and let me know of more changes.

Step 6: Once you are happy with the website, I will send you all the access information and get written approval from you. If there is any more design work from this point, it would be considered an update (cost information listed below).

Update After Website is Complete (as needed) Cost • \$30 per hour *(\$15 minimum if work takes 30 minutes or less)*

Any design cost will be charged on top of the update. This includes any cost of fonts/elements to design during updates.
